Step 1

Step 2

Step 3

Step 4

Installation Instructions:

1. Install lower Bracket (3) over the tab on the row unit seed tube
2. Swing the upper bracket (2) into place, aligning the holes in the upper bracket (2) with the hole in the seed tube.
3. Push ball detent pin (4) through hole to retain the placement tube assembly.
4. Route tubing through placement tube and cut to desired length. (Extra hose can be fed out of the bottom to alter the placement location if needed)
